Justice Hughes made a set speech at Detriot Monday and opened another crate of rotten eggs. Mr. Hughes assailed the administration's course toward upholding Americah rights abroad during the European war. "When I say that I am an American citizen," he said, "I ought to say the proudest thing that any man can say in this world. But you can't have that pride if American citizenry is a cheap thing, if it is not worthy of protection this wide world overr. There is no man who could successfully present to an American community the platform that an American citizen's rights stop at the coast line and that beyond that American life is to be the prey of any marauder that chooses to

take it." This vehement reference to the "marauder" who has excited his ire, is not likely to please even the German-American Republicans, who are supposed to be his warmest supporters. From saying nothing at all, Mr. Hughes is about to go to the other extreme and talk his head off.

UDDER DEVELOPMENT OF COW

Sufficient Importance Not Placed on Dairy Characteristics by Dairy Cattle Owners.

Many owners of dairy cattle do not place sufficient importance on the purely dairy characteristics of the animals they keep and breed. One of the points often overlooked is udder development, although it would seem that this would be the first thing an intelligent dairyman would look for in the selection of a cow. While an occasional cow with a small, ill-shaped udder will give a good quantity of milk, such animals are merely the exceptions which prove the rule that good dairy cows should show good development of the milk organs.

The good udder is large but does not display its size by hanging in a

It is not only downright carelessness to keep money in your house, but it subjects you and your family to grave DANGER.

Not only may you lose it by fire, but burglars may break in and steal it. Burglars always "spot" the houses where money is kept and they will stop at nothing-even MURDER--to get it.
